LYCOS B. BLANZA

SOFTWARE ENGINEER & DEVELOPER

Email: blanzalycos@gmail.com | Location: Lipa City, Batangas, Philippines | Phone: 0995 678 3687

Portfolio: blanza-lycos-portfolio.vercel.app | GitHub: github.com/lycos-dev

PROFESSIONAL SUMMARY

I'm a 4th BS Computer Science student with hands-on experience developing web and mobile applications and coordinating a four-person AI/IoT thesis team. Skilled in React, TypeScript, JavaScript, Python, and Java, with exposure to API integration, databases, testing , and technical documentation. Available for a full-time software development or related IT internship.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Python, Java, C++

Development Tools: Git, VS Code, Linux / CLI

Backend & Data: Node.js, Express, PostgreSQL, MySQL, Prisma, Supabase, REST APIs

Frontend & Mobile: React, React Native, Expo, Vite, HTML/CSS

Intelligent Systems: ESP32, IoT, Computer Vision, Machine Learning

Currently Learning: Automated Testing (Jest or Pytest), Docker & CI/CD, Cloud Fundamentals, DevOps

PROJECT & INNOVATION EXPERIENCE

SafeSeat | Project Manager · Undergraduate Thesis
ESP32 · C++ · Python · IoT Sensors · Computer Vision

- Managed a four-person team building an add-on passenger safety system for five-seater vehicles using mmWave, pressure, temperature, and motion sensors with event-based computer vision.
- Planned milestones, resolved integration issues, and coordinated testing of anomaly detection, posture verification, and mobile notification workflows.
- Led technical reviews and documentation to support debugging, demonstrations, and privacy-conscious camera activation.

DocVia | Web Application Developer
React · TypeScript · Vite

- Built a PDF-based learning platform with structured lessons, learning paths, and a navigable study interface.
- Implemented contextual AI tutor interactions and quiz workflows for review and active recall.

NEXA | Mobile Application Developer
React Native · Expo · TypeScript · AsyncStorage

- Developed a fitness tracker for planning routines, logging workouts, and reviewing training history.
- Created reusable mobile screens and retained user data between sessions with AsyncStorage.

CaLaBaRZon Young Innovators' Challenge | Creativity Track Participant — Apr 2026
Collaborated on a design-thinking pitch proposing a practical solution to a barangay or community-level concern.

EDUCATION & RECOGNITION

De La Salle Lipa — 2023–2027 (Expected)
Bachelor of Science in Computer Science
Second Honor Awardee · First Semester, AY 2025–2026 · GPA 3.6389

LCC Silvercrest School — 2021–2023
Senior High School

Bolbok Integrated National High School — 2018–2021
Junior High School

CERTIFICATIONS & COURSEWORK

DataCamp

Programming: Introduction & Intermediate Python; Introduction & Intermediate R

Data & Statistics: Data Manipulation with Pandas; Introduction to the Tidyverse; Statistical Fundamentals; Exploratory Analysis Theory; Statistical Experimentation

Deep Learning: Deep Learning for Text with PyTorch

SEMINARS & WORKSHOPS

Bridging Ethical Hacking and Data Analytics — Jan 2026
CITE visiting expert seminar on security and data analytics for safer systems.

Innovative Research Horizons 2026 — Feb 2026
Research seminar organized by DLSL student engineering and computing groups.

Project Deep Dive: Animo.Dev, Session 2 — Mar 2026
Reaction Ring development: hardware, programming, and behind-the-scenes process.

Hello World to the Real World — Apr 2026
Tech-industry survival guide and software engineering career perspectives.

Career Launchpad & The Grit Factor — Aug 2026
Career 104 and SEEDS 104 sessions on campus-to-career preparation and resilience.

JPCS Masterclass 101 — May 2025
Masterclass hosted by the Junior Philippine Computer Society at DLSL.

LANGUAGES & STRENGTHS

Languages: Filipino (Native) | English (Intermediate)

Key Strengths: Problem-Solving; Project Coordination; Team Collaboration; Technical Documentation; Troubleshooting; Adaptability; Agile & Scrum; System Design & Integration
